INTEGRATED COMPUTER SOLUTIONS, INC. WINS APPLICATION MAINTENANCE AND SUPPORT CONTRACT WITH THE STATE OF FLORIDA'S DEPARTMENT OF ENVIRONMENTAL PROTECTION

FOR IMMEDIATE RELEASE

Montgomery, AL, July 31, 2012 - Integrated Computer Solutions, Inc. (ICS) is pleased to announce that the Florida Department of Environment Protection (DEP) has extended a contract with ICS for application support and maintenance outsourcing for fiscal year 2012-2013.

The application maintenance and support contract originally awarded to ICS through the Office of Technology Information Services (OTIS) in 2010 provided a new type of maintenance outsourcing for DEP. ICS had the initial responsibility of maintaining and supporting standard and proprietary applications deployed within DEP, which ICS was able to do at a significant cost savings to the agency.

Saving the State of Florida more than 30% and over \$600,000 in the first two years with improved pricing and increased productivity, the ICS service arrangement has now been expanded to include 28 applications across six divisions. The new contract is valued at over \$1,000,000 for fiscal year 2012-2013, and is expected to continue to save the agency significant resources as ICS optimizes additional applications and improves application management efficiency.

The Florida Department of Environmental Protection protects, conserves and manages Florida's natural resources and award-winning state park system, while enforcing the State's environmental laws.

"ICS is very familiar with the unique technical security and outsourcing needs of State and Federal agencies," said Chip Schuneman, Chief Operating Officer for ICS. "For the past fifteen years, we have helped agencies optimize their application environment while meeting the highest technical regulatory requirements. From the State of Florida to the United States Department of Defense—it's what we do every single day," Schuneman said.

###

Integrated Computer Solutions, Inc. (www.ICSInc.com) is a premier information security and technology consulting firm with operating locations throughout the United States. Established in 1997, ICS provides a robust portfolio of technology and information security services to a wide range of Federal, State, and Fortune 1000 clients. The services that ICS offers include outsourcing, staff augmentation and support, network penetration testing, application vulnerability testing, disaster recovery and business continuity planning, risk assessments, WAN optimization, forensics, and incident response services.
