INTEGRATED COMPUTER SOLUTIONS, INC. AWARDED CONTRACT WITH THE STATE OF FLORIDA'S DEPARTMENT OF ENVIRONMENTAL PROTECTION

Cost savings to the State of Florida amount to more than 30% over previous year

FOR IMMEDIATE RELEASE

Montgomery, AL, September 7, 2010

Integrated Computer Solutions, Inc. (ICS) announced today that the Florida Department of Environment Protection (DEP) recently awarded ICS a contract for application support and maintenance outsourcing. The contract, awarded through the Office of Technology Information Services (OTIS), is valued at just over \$700,000 for fiscal year 2010-2011, and is a new type of maintenance outsourcing for DEP.

Through this new contract, ICS has the initial responsibility of maintaining and supporting standard and proprietary applications deployed throughout seven business units within DEP. OTIS expects business units to increase the number of applications over time as they realize the value and cost savings associated with ICS' service arrangement. The contract is expected to save the agency an estimated 30 percent compared to FY 2009 expenditures for the same services, due to improved pricing and increased productivity.

No stranger to the unique technical security and outsourcing needs of State and Federal agencies, ICS provides similar services for the States of Mississippi and Alabama, as well as the United States Department of Defense. "ICS has consistently offered innovative, best-in-class solutions to help many agencies become more efficient and save taxpayers money," said Chip Schuneman, Chief Operating Officer for ICS. "This is especially important in today's economic environment, wherein agencies are faced with significant budget challenges, an ever-increasing demand for talented resources and high quality service."

John Willmott, DEP's CIO said, "We look forward to working with ICS, as they have a long-standing history of successful performance-based contracts for the State of Florida. ICS' focus on superior service, quality, and cost savings will be visible across the state, as they afford DEP the opportunity to save significant taxpayer dollars."

The contract became effective on August 2, 2010.

###

Integrated Computer Solutions, Inc. (www.ICSInc.com) is a full-service information security and technology consulting and professional services firm with operating locations throughout the United States. Established in 1997, ICS provides a robust portfolio of technology and information security services to a wide range of Federal, State, and Fortune 1000 clients.
