INTEGRATED COMPUTER SOLUTIONS, INC. AMONG COMPANIES AWARDED STATE OF MISSISSIPPI IT SECURITY & RISK ASSESSMENT SERVICES CONTRACT

FOR IMMEDIATE RELEASE
Montgomery, AL, March 4, 2010
Integrated Computer Solutions, Inc. (ICS), a full-service information security and technology consulting firm, is one of only five companies to be awarded a two-year contract by the State of Mississippi for IT security and risk assessment services. The contract, awarded through the State of Mississippi's Department of Information Technology Services, will allow all Mississippi state, county and municipal agencies as well as state educational institutions to acquire information technology security and risk assessment services that meet the highest technical and policy standards for legislative and regulatory compliance.

"ICS is proud to continue our legacy of providing the highest quality information security and technology services to our state partners," said Steve Goldsby, Chief Executive Officer of ICS, Inc. "ICS understands the unique challenges that face agencies and institutions in state government, and we are recognized for providing solutions that help ensure these agencies are able to serve their citizens effectively and efficiently, each and every day," he said.

ICS offers a dynamic portfolio of security-driven IT solutions for global businesses and government. According to Goldsby, it is the company's proactive approach to information security which allow organizations to streamline productivity and increase efficiencies that earned them this contract.

"ICS stands out against the competition with three key factors," Goldsby said. "Our proven track record of professionalism and success in past performance, our expert personnel and our wide range of technical capabilities."

Goldsby added that ICS is excited to begin building a mutually beneficial working relationship with Mississippi. "We look forward to serving the agencies within the great State of Mississippi as well as its citizens to reduce the risk and increase the cyber-security of the MS state government," he said.

ICS is in its twelfth year of providing state and federal agencies with IT security services and products, and has recently been awarded similar contracts by the State of Florida and the State of Alabama.

###

Integrated Computer Solutions, Inc. (www.ICSInc.com) is a full-service information security and technology consulting and professional services firm with operating locations throughout the United States. Established in 1997, ICS provides a robust portfolio of technology and information security services to a wide range of Federal, State, and Fortune 1000 clients. The services that ICS offers include outsourcing, staff augmentation and support, network penetration testing, application vulnerability testing, disaster recovery and business continuity planning, risk assessments, WAN optimization, forensics, and incident response services.
